2015/02/06 23:10:06

Robots expect humans
to act like this truck driver.

2015/02/06 23:10:08

STOP

4-WAY

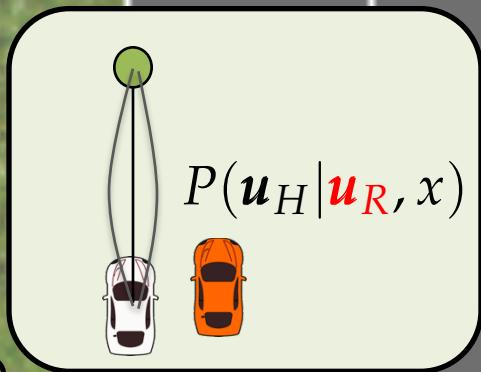

(Nominally,) The robot's actions affect those of the human's.

Accounting for this effect improves efficiency and interaction fluency.

$$\max_{\mathbf{u}_R} \int U_R(x, \mathbf{u}_R, \mathbf{u}_H) P(\mathbf{u}_H|x) d\mathbf{u}_H$$

$$\max_{\mathbf{u}_R} \int U_R(x, \mathbf{u}_R, \mathbf{u}_H) P(\mathbf{u}_H | \mathbf{u}_R, x) d\mathbf{u}_H$$

Interaction as a Underactuated System

$$\max_{\mathbf{u}_R} \int U_R(x, \mathbf{u}_R, \mathbf{u}_H) P(\mathbf{u}_H | \mathbf{u}_R, x) d\mathbf{u}_H$$

$$P(\mathbf{u}_H | \mathbf{u}_R, x)$$

$$U_H(x, \mathbf{u}_R, \mathbf{u}_H)$$

Interaction as a Underactuated System

$$U_R(x, \mathbf{u}_R, \mathbf{u}_H)$$

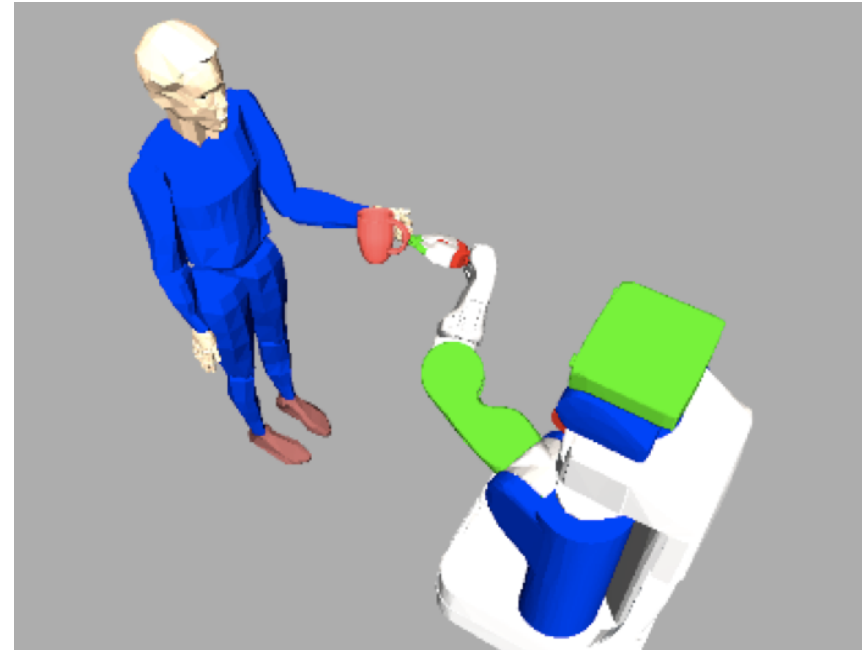

$$U_H(x, \mathbf{u}_R, \mathbf{u}_H)$$

Independent vs. Collaborative

$$U_R \neq U_H$$

*Planning for Autonomous Cars
that Leverage Effects
on Human Actions, RSS'16*

$$U_R = U_H$$

*Implicitly Assisting Humans
to Choose Good Grasps in Robot to
Human Handovers, ISER'16*

Independent vs. Collaborative

$$U_R \neq U_H$$

$$U_R = U_H$$

U_R
R efficiency

U_R
R efficiency

U_R
R efficiency

The robot can
be more efficient.

The robot
can be safer.

u_R
specific effect on u_H

U_R
specific effect on u_H

U_R
specific effect on u_H

u_R
specific effect on u_H

U_R
specific effect on u_H

u_R
specific effect on u_H

u_R
specific effect on u_H

Working interaction strategies emerge out of the optimization.

— Learned Human Model

— Avoid Human

— Affect Human

Independent vs. Collaborative

$$U_R \neq U_H$$

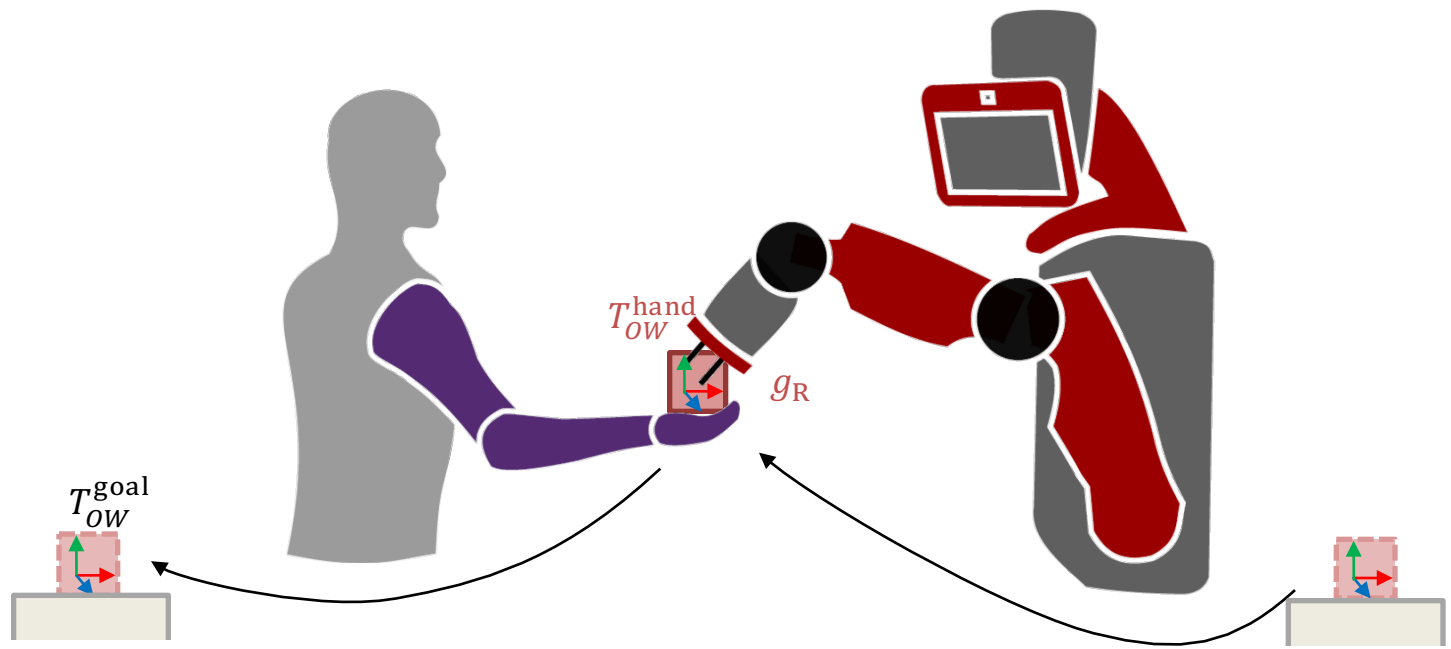

$$U_R = U_H$$

[Trautman'10]

[Kuderer'12]

[Nikolaidis'15]

$$U_H(x, \mathbf{u}_R^0, \mathbf{u}_H^0) \text{ greedy}$$
$$U_R = U_H(x, \mathbf{u}_R, \mathbf{u}_H)$$

$$U_H(x, \mathbf{u}_R^0, \mathbf{u}_H^0) \text{ greedy}$$
$$U_R = U_H(x, \mathbf{u}_R, \mathbf{u}_H)$$

The robot can assist the human
in finding better planning solutions.

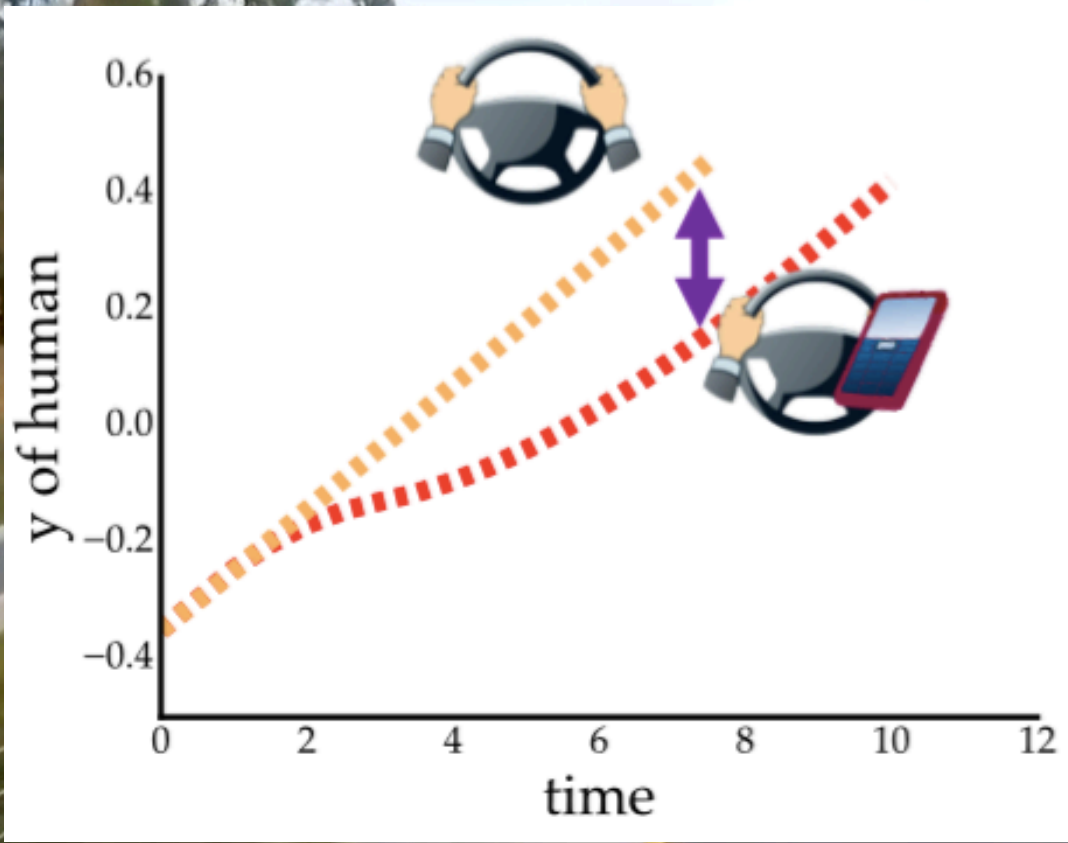

Independent vs. Collaborative

$$U_R \neq U_H$$

$$U_R = U_H$$

2015/02/06 23:10:05

Robot actions affect human actions.

Robot actions affect human trust?

Thanks!

Dorsa Sadigh

Aaron Bestick
